The ZoundZ Project is inspired by Linux project by Mr. Linus Trovals.

ZoundZ Nation is founded by R4Ve X, aiming for the best service for the artist out there who deserve reputation and fame.

The name to this project was given by another person (we can't mention the name here), but he passed out at early 2026 due to cancer.

Currently the label is led by R4Ve X, while due to it's open source nature anyone is more than welcome to join the management team and work with us.

Current contributors – R4Ve X, MusicVibe, Inferno, Itzz Sein Music & Default.
